

CHALLENGING VIRAL PARADIGMS

June 15-17, 2018

VERS PONT DU GARD France.

POLIO HIV HPV EBOLA ZIKA

Medicine meets the business concept: unmasking the flaws behind profit-driven research and practice.

We held a conference six years ago here in the south of France.

<http://maisondemartin.com/docs/ConferenceReport.pdf> The goal was to reveal to the world the corruption surrounding AIDS science and treatment.

But HIV/AIDS is just one example of many viral paradigms which coincide with \$millions in pharma income. But is each virus proven to be pathogenic? Have they all been properly identified? What are the implications for safer treatments other than dangerous antiviral medicines and vaccines?

Coming to the conference: John Lauritsen, Mike Hersee, Joan Shenton, Helen Lauer (paper), David Crowe, Marco Ruggiero (Skype), Etienne de Harven Robert Crumb, David Rasnick, Roberto Giraldo ...more

VERS PONT DU GARD is 45 minutes from Avignon by bus, 90 minutes from Marseilles. You can reach Avignon from Paris taking the TGV fast train from the Gare de Lyon. Let us know if you are coming and if you need lodging for which nights.

Free camping is available. Conference cost: free

Sincerely,
Martin Barnes
